BIT Defensive Growth I-I (EUR)

WKN: A3EKR2 ISIN: DE000A3EKR20

Investment strategy

The BIT Defensive Growth fund is an actively and independently from a benchmark managed equity fund that invests in technology companies globally. Through investments in global technology stocks, the Fund aims to achieve positive performance over the recommended investment horizon of at least five years. The flexible investment approach adapts to dynamic market conditions in the Fund's relevant sectors. The Fund's investment team works with a structured investment process that incorporates classic, bottom-up fundamental analysis and innovative use of alternative data sources to assess the value of a stock. At any given time, the Fund holds a small number of securities that the fund manager believes have the potential to multiply in value over the next few years. The portfolio is expanded with carefully selected securities from our research longlist that exhibit positive correlation characteristics and uses a hedge overlay with derivatives for risk management.

Commentary as of 31.05.2026

Despite the absence of a definitive resolution to the Iran conflict, capital markets advanced significantly in May, supported by solid macroeconomic data. The US labour market remained robust and economic growth stabilised at 1.6% per annum. On inflation, the pass-through effect of higher energy prices on the core rate became increasingly visible, with the month-on-month reading rising by 0.4%. On monetary policy, Kevin Warsh was sworn in as the new Federal Reserve Chair. As he is perceived by markets as broadly dovish, the current market pricing of one rate hike in December appears appropriate to us.

The fund once again benefited materially from its positioning along the AI infrastructure value chain, outperforming the Nasdaq 100 by a significant margin. The portfolio was fully invested throughout the month, allowing full participation in market upside. The systematic options overlay weighed on performance as expected but was more than offset by the strength of equity returns. In addition, we deliberately refrained from writing additional calls in light of the positive market momentum, thereby reducing the potential performance drag from the overlay.

For the months ahead, we expect a continued robust economic backdrop and sustained AI investment momentum. We therefore remain constructively positioned in structural winners while keeping inflation and interest rates in focus as the central source of uncertainty.

Disclaimer

This is a marketing material.

Please read the prospectus and the key information document (PRIIPs KID) before making a final investment decision. Legal basis of the investment in the fund is the PRIIPs KID, the currently valid prospectus, the most recent audited annual report and the most recent unaudited semi-annual report. The aforementioned documents are available free of charge in German from Hansainvest (Hanseatische Investment-GmbH), Kapstadtring 8, 22297 Hamburg (check <https://fondswelt.hansainvest.com/de/fondswelt/fondsuebersicht>). Risks can be found in the prospectus. The PRIIPs KID must be made available prior to the investment. The tax treatment depends on the individual circumstances of each investor. This marketing material is for information purposes only and does not constitute a solicitation to buy or sell shares of the fund. In particular, the recipient is recommended, if necessary with the assistance of an advisor, to check the information with regard to its compatibility with one's own personal circumstances, legal, regulatory, tax and other consequences. No assurance can be made that the investment objectives will be achieved. This marketing material is directed exclusively to interested parties in countries in which the fund is authorized for public distribution.

The fund was established under German law and is authorized for distribution in Germany, Austria and Switzerland. The fund may not be publicly offered for sale in the United States of America or for the benefit of U.S. persons.

Past performance, simulations or forecasts are not a reliable indicator for future performance. The gross performance according to the BVI method does not take into account the costs charged on issuance and redemption of shares (subscription fee and redemption fee) and fees incurred during the holding period (e.g. transaction costs). If an investor wants to invest shares for EUR 1,000.00, with a subscription fee of 0% the investor must pay EUR 1,000.00. The investor may incur custody costs and other costs, which reduce the performance. It should be noted that the value of the acquired shares may fluctuate due to fluctuation in the underlying investments of the fund and the listing of the securities.

Opportunities & Risks

Opportunities: Technology stocks have high return potential in the long term. With a successful selection of individual stocks, there is the opportunity to generate additional returns through active management.

Risks: The fund actively invests in high-growth technology companies and may therefore be subject to relevant fluctuations in value. The fund is managed independently from a benchmark. The sector may underperform relative to the market. General, geographic and geopolitical country risks, as well as currency risks, may negatively impact performance. Although the fund aims for positive performance, this cannot be guaranteed. The financial instruments explained in more detail in the fund documents involve significant risks up to the complete loss of the invested capital. However, the investor's risk is limited to the amount invested. Investors should have understood these risks before making an investment decision to invest. Investments in this fund are suitable for investors with a long investment horizon and a corresponding willingness and ability to take risks. A Hedge-Overlay with derivatives can reduce the risks of the stock portfolio. However, itself it bears costs, liquidity and basis risks. Furthermore, it can limit potential gains and lead to losses.

Please read the sales prospectus, mainly the risk information within the sales prospectus, to overview all opportunities and risks.

BIT Capital - Berlin Investment Technologies

BIT Capital is an asset manager combining the expertise of an industry leader in asset management with the agility and drive of a young technology company. The actively managed equity and crypto funds empower investors to benefit from both mass-market potential of established technologies and the high growth potential of emerging technologies and their adoption leaps. At BIT Capital analysts and algorithms work together as a team, where humans and technology complement and enhance each other.

The experienced BIT Capital team comprises 40 professionals includes a 20-person investment team made up of financial market experts, sector specialists, data engineers and software developers. With its investment products, BIT Capital offers investors the opportunity to participate in the future growth of an increasingly technologized world. Driven by our core philosophy "Ahead of the Curve" - we position ourselves to be where megatrends and major investment opportunities of the future already taking shape.

In doing so, the BIT Capital Team navigates the constantly evolving landscape of complex technology sectors and identifies tomorrow's industry leaders at an early stage for its investors.
