Investment strategy

The BIT Global Technology Leaders fund is an actively and independently from a benchmark managed equity fund that invests in companies in the Technology sector. Through investments in technology-driven high-growth stocks, the Fund aims to achieve positive performance over the recommended investment horizon of at least five years. The flexible investment approach adapts to dynamic market conditions in the Fund's relevant sectors. The Fund invests worldwide. The Fund's investment team works with a structured investment process that incorporates classic, bottom-up fundamental analysis and innovative use of alternative data sources to assess the value of a stock. At any given time, the Fund holds a small number of securities that the fund manager believes have the potential to multiply in value over the next few years.

Commentary as of 31.10.2025

October was a strong month for equities, driven by continued gains in AI-related names. The Federal Reserve cut rates by 25 bps but maintained a cautious tone, indicating future moves depend on incoming data. Policy support, resilient growth, and the AI revolution kept investor sentiment upbeat, especially in technology, with Nvidia briefly exceeding USD 5 trillion in market value.

Our fund returned 3.9% in October. Key contributors included IREN, Micron, AMD, HUT 8 Mining, and Nvidia, all benefiting from increased demand for AI infrastructure and accelerating capital expenditure in the semiconductor value chain.

Major tech companies—Alphabet, Microsoft, Amazon, and Meta—reported strong, often accelerating revenue in late October, leading to positive share-price reactions.

Our Amazon position anticipated revenue acceleration at AWS, which delivered +7% quarter-on-quarter growth. Amazon's in-house Trainium chips are gaining traction, with Anthropic scaling to 1 million chips by end-2025. Strong advertising and same-day delivery in its marketplace business, combined with AI execution and customer interaction, are crucial for the transition to agentic commerce. Amazon's logistics leadership positions it well to benefit from robotics automation through real-world AI.

Disclaimer

This is a marketing material.

Please read the prospectus and the key information document (PRIIPs KID) before making a final investment decision. Legal basis of the investment in the fund is the PRIIPs KID, the currently valid prospectus, the most recent audited annual report and the most recent unaudited semi-annual report. The aforementioned documents are available free of charge in German from Hansainvest (Hanseatische Investment-GmbH), Kapstadtring 8, 22297 Hamburg (check

<https://fondswelt.hansainvest.com/de/fondswelt/fondsuebersicht>). Risks can be found in the prospectus. The PRIIPs KID must be made available prior to the investment. The tax treatment depends on the individual circumstances of each investor. This marketing material is for information purposes only and does not constitute a solicitation to buy or sell shares of the fund. In particular, the recipient is recommended, if necessary with the assistance of an advisor, to check the information with regard to its compatibility with one's own personal circumstances, legal, regulatory, tax and other consequences. No assurance can be made that the investment objectives will be achieved. This marketing material is directed exclusively to interested parties in countries in which the fund is authorized for public distribution.

The fund was established under German law and is authorized for distribution in Germany, Austria, Luxembourg and Switzerland. The fund may not be publicly offered for sale in the United States of America or for the benefit of U.S. persons.

Past performance, simulations or forecasts are not a reliable indicator for future performance. The gross performance according to the BVI method does not take into account the costs charged on issuance and redemption of shares (subscription fee and redemption fee) and fees incurred during the holding period (e.g. transaction costs). If an investor wants to invest shares for EUR 1,000.00, with a subscription fee of 0% the investor must pay EUR 1,000.00. The investor may incur custody costs and other costs, which reduce the performance. It should be noted that the value of the acquired shares may fluctuate due to fluctuation in the underlying investments of the fund and the listing of the securities.

Opportunities & Risks

Opportunities: Technology stocks have high return potential in the long term. With a successful selection of individual stocks, there is the opportunity to generate additional returns through active management. The structural change in the global economy towards higher digitalization and greater technology penetration opens opportunities to invest in the winners of the future over the long term with this fund.

Risks: The fund actively invests in high-growth technology companies and may therefore be subject to relevant fluctuations in value. The fund is managed independently from a benchmark. The sector may underperform relative to the market. General, geographic and geopolitical country risks, as well as currency risks, may negatively impact performance. Although the fund aims for positive performance, this cannot be guaranteed. The financial instruments explained in more detail in the fund documents involve significant risks up to the complete loss of the invested capital. However, the investor's risk is limited to the amount invested. Investors should have understood these risks before making an investment decision to invest. Investments in this fund are suitable for investors with a long investment horizon and a corresponding willingness and ability to take risks.

Please read the sales prospectus, mainly the risk information within the sales prospectus, to overview all opportunities and risks.

BIT Capital - Berlin Investment Technologies

BIT Capital is an asset manager combining the expertise of an industry leader in asset management with the agility and drive of a young technology company. The actively managed equity and crypto funds empower investors to benefit from both mass-market potential of established technologies and the high growth potential of emerging technologies and their adoption leaps. At BIT Capital analysts and algorithms work together as a team, where humans and technology complement and enhance each other.
